TO ALL HOMEOWNERS OR OCCUPANTS

MARMOT CONSTRUCTION LTD. will be starting repairs to the concrete in your area within the next two (2) days. We would appreciate it if you could find alternate parking for any vehicles that need to be used during the construction period.

Complete construction usually takes 4 - 6 weeks, weather permitting. Any concrete to be removed will be marked by the City of Calgary in **orange and/or white paint**. As a result, it may be that access to your property will be restricted. We will endeavor to cause as little disruption as possible and hope you can bear with us during this period.

We would ask as well that any underground sprinklers adjacent to the construction be marked with a stake in order for us to not damage your property.

As part of the process, it is necessary for us to remove some of the sod adjacent to the area being repaired. Our landscaping crew will replace with topsoil and sod, with a **one time only** watering once forms have been removed. It will then be the homeowner's responsibility to keep this area moist.

We thank you in advance for your co-operation in this matter.
